→ linkedin.com/in/mihir-panchal-5167811a4

Full-stack software engineer specializing in scalable web applications, backend architecture, and product-driven system design.

Built and deployed devSemble—a community-first multi-tenant platform—while contributing to SaaS product development across React, Node.js, NestJS, MongoDB, and PostgreSQL.

Strong focus on scalable system design, authentication workflows, performance optimization, and translating complex product requirements into reliable user experiences.

EXPERIENCE

Full Stack Developer — 13rinda Inc. (CondAI)

APR 2026 – PRESENT

- Developing and scaling **CondAI**, a SaaS platform focused on condominium management and operational workflow automation.
- Building and maintaining end-to-end product features using **React**, **NestJS**, and **PostgreSQL** across frontend and backend systems.
- Designing scalable backend modules, structured APIs, and database schemas to support reliable platform growth.
- Developing and integrating **REST APIs** and third-party services to extend application capabilities.
- Optimizing application performance, backend reliability, and cloud-hosted deployment workflows.
- Collaborating on system architecture, feature delivery, debugging, and continuous technical improvements across the platform.

Founder & Lead Full-Stack Engineer — devSemble

JAN 2024 – PRESENT

Designed and developed a scalable community-first developer platform from scratch using the MERN stack, with 1.5K+ developers building their reputation.

- Architected RESTful backend using Node.js & Express
- Designed JWT-based authentication and role-based access control
- Built scalable MongoDB schema with optimized indexing
- Implemented subdomain-based multi-tenant routing architecture
- Developed competitive coding engine with submission tracking & ranking algorithms
- Implemented Redis caching and real-time features using Socket.IO

LANGUAGES

JavaScript (Advanced),
Python, C++, Java,
TypeScript, Shell Scripting
(introductory)

FRONTEND

React.js, Redux, Material-UI,
Next.js, Figma

BACKEND

Node.js, Express.js, NestJS

DATABASE & CACHING

MongoDB, PostgreSQL,
Redis

DEV OPS & INFRASTRUCTURE

AWS EC2, Nginx, Linux,
GitHub Actions, Docker
(working knowledge)

CORE CONCEPTS

System Design, REST APIs,
Authentication (JWT/OAuth),
RBAC, Multi-Tenant
Architecture, Performance
Optimization, Socket.IO,
GitHub API Integration,

- Deployed infrastructure on AWS EC2 with Nginx configuration
- Built reusable React component architecture for maintainable UI
- Optimized interaction flows for coding submissions and hackathon participation
- Ensured responsive, performance-optimized frontend using Material-UI

Geo-Attendance & Defaulters Management System

JAN 2024 - APRIL 2024 (MSc.IT Capstone Project – Team Lead)

Led a cross-functional team to design and deploy a geo-location based attendance mapping platform.

Highlights:

- Built and deployed within 1 month on AWS infrastructure
- Handled peak concurrency of ~3,000 active users during attendance windows
- Designed backend architecture and database models
- Implemented automated defaulters calculation engine
- Coordinated frontend and mobile UX flows for smooth attendance capture
- Designed deployment pipeline and production configuration

Speaker — IIT Bombay (2024)

Delivered session on Collaborative Team Building and technical workflow management using Git-based systems.

Freelance Full-Stack Developer

2020 – Present

Delivered scalable web solutions across e-commerce, admin systems, and business platforms.

Worked on multiple client projects across industries including e-commerce, education systems, and portfolio platforms. Selected representative projects are listed below.

Selected Projects:

MuskanLabel/Zentury (E-commerce Platform)

- Developed full MERN stack application
- Integrated Paytm payment gateway
- Integrated SendGrid email workflows
- Implemented Cloudinary-based media handling
- Deployed on AWS EC2 with optimized checkout UX

Urban Elements (Portfolio Platform)

- Built responsive React-based frontend
- Improved UI structure and user navigation flows
- Integrated email communication system

Exam Portal

- Designed dual-interface system (Admin Web + Mobile MCQ Platform)
- Implemented role-based dashboards
- Integrated SendGrid, Cloudinary, and Paytm APIs
- Structured backend APIs for exam lifecycle management
- Optimized user exam flow for clarity and reduced friction

EDUCATION

SK Somaiya College, Mumbai — *MSc.IT*

2022 - 2024

- Led development of Geo-Attendance & Defaulters Management System
- Coordinated cross-functional team during capstone project
- Focus areas: Backend Architecture, Database Design, Distributed Systems

Shree L.R. Tiwari Degree College, Mumbai — *BSc.IT*

2019 - 2022

- Technical Head — Technova Fest (2 Years)
- Designed and maintained official event website
- Led technical event planning & execution
